

YASH KAVAIYA

Forward Deployed Engineer | AI Solutions Architect

Pune, India | +91-9265745362 | yash.kavaiya3@gmail.com
github.com/Yash-Kavaiya | linkedin.com/in/yashkavaiya

PROFESSIONAL SUMMARY

Client-facing Forward Deployed Engineer with 4+ years of expertise in architecting and deploying scalable AI solutions. Specialist in **Agentic AI**, **RAG (Retrieval-Augmented Generation)**, and **semantic search architectures**, with a proven track record of delivering enterprise-grade implementations for global clients. Expert in **Python-based solution engineering**, performance tuning, and result relevancy validation. Experienced in leading technical workshops and migration assessments, bridging the gap between complex engineering requirements and customer success.

TECHNICAL SKILLS

- **AI & Search:** RAG Architectures, Agentic AI (LangChain, LangGraph), Vector Search Concepts, LLM Fine-tuning, Prompt Engineering, Model Context Protocol (MCP)
- **Languages:** Python (Expert), Node.js, TypeScript
- **Databases:** Firestore (NoSQL), BigQuery, Data Modeling for AI Retrieval
- **Cloud & DevOps:** GCP (Cloud Run, Vertex AI), AWS (Lambda, ECS), Azure, Docker, Kubernetes, Terraform
- **Integrations:** Salesforce, MuleSoft, MS Dynamics, REST/GraphQL APIs

PROFESSIONAL EXPERIENCE

Senior Conversational AI Engineer (Client-Facing)

Nov 2025 – Present

EXL Services Digital Transformation

Pune, India

- **Strategic Technical Delivery:** Lead technical engagements for enterprise clients, designing multi-agent architectures that integrate complex backend systems with AI interfaces.
- **Performance Tuning:** Responsible for validating and fine-tuning AI model outputs to ensure high relevancy and accuracy (95%+) for customer-specific use cases.
- **Solution Architecture:** Architect scalable deployment pipelines using Python and Node.js on GCP and AWS, ensuring high availability for critical client operations.
- **Customer Workshops:** Conduct technical deep-dive sessions to assess client infrastructure and guide migration strategies for AI adoption.

Senior AI Solutions Developer

Oct 2024 – Nov 2025

Accenture Google Business Group

Pune, India

- **Agentic AI Deployment:** Architected a sophisticated multi-agent AI system for a major US retail client, utilizing Google's Agent Development Kit and Gemini Live API to solve real-world customer service challenges.
- **Search & Retrieval:** Designed intent hierarchies and data retrieval workflows, optimizing the semantic understanding of customer queries regarding products, shipping, and returns.
- **Scalable Infrastructure:** Deployed auto-scaling solutions on Cloud Run with TypeScript/Python APIs, handling high-volume real-time traffic.
- **CI/CD & Quality Assurance:** Established robust testing frameworks and CI/CD pipelines to validate solution performance across development, staging, and production environments.

Conversational AI Engineer

Oct 2021 – Oct 2024

Tata Consultancy Services

Bangalore, India

- **Financial Services Platform:** Delivered a global AI platform handling complex trading queries; integrated MuleSoft for secure data retrieval and routing.
- **NoSQL Implementation:** Leveraged Firestore (NoSQL) and BigQuery to structure conversation data for analytics, enabling data-driven improvements in search result quality.
- **Client Consulting:** Acted as the technical point of contact for banking and healthcare clients, translating business requirements into technical architectural diagrams and deployment plans.
- **Legacy Migration:** Led migration assessments and implementation for moving legacy systems to modern cloud-native AI platforms (Dialogflow CX, AWS Lex).

KEY ACHIEVEMENTS & OPEN SOURCE

- **Hackathon Leadership (Agentic AI):** Finalist in Google-Accenture Agentic AI & Google Vertex AI Hackathons; built “Agent Buddy” toolkits to assist developers in debugging complex AI flows.
- **Technical Education & Community:** Conducted 122+ technical workshops and published courses with 800+ students, demonstrating strong ability to articulate complex technical concepts to diverse audiences.
- **Open Source Contributor:** Active contributor to the Google ADK Python library, enhancing authentication and session management modules used by the developer community.

EDUCATION

Indian Institute of Technology (IIT) Madras

Online Diploma in Data Science (NLP & ML focus)

National Institute of Technology (NIT) Surat

Master of Science in Physics

CERTIFICATIONS

- **Google Cloud:** Digital Leader, Intro to Large Language Models
- **AWS:** Certified Cloud Practitioner
- **Microsoft:** Azure AI Fundamentals (AI-900)

Crafted for Vector Search Excellence
